PROJECTS

MY PERSONAL PORTFOLIO

Next js - CSS - Three js - Framer motion - GSAP

- My personal portfolio website showcases my expertise as a front-end developer and highlights my passion for creativity and innovation. Featuring immersive 3D models and captivating animations, I utilized advanced techniques such as masking and animation libraries like Framer Motion and GSAP to bring my website to life. This interactive platform not only demonstrates my technical skills but also reflects my commitment to delivering visually stunning digital experiences.

SCREENIFY

Next js - CSS - Framer motion

- Developed with Next.js, integrating app routing for seamless navigation, and leveraging grid display to maintain website responsiveness, this platform provides effortless exploration of a diverse collection of films and TV shows. Intuitive search and filtering features enhance the user experience, ensuring that the content is easily accessible across various devices and screen sizes.

SCOUT

React js - CSS

- Utilizing React Router for seamless navigation, the Scout Renting Web App features a tidy layout for easy client engagement. Users can effortlessly browse scouting locations and rental options, with an intuitive interface designed for comfort and visual appeal. Ideal for scouting film locations or rental equipment, this platform ensures a user-friendly experience from start to finish.
